

Measure L - Local Roads First

In November 2016, Measure L, the countywide transportation sales tax measure passed with nearly 72 percent of the vote, the highest percentage by a first time transportation measure since 1989.

This shows the tremendous need in the community and speaks to the fact that 65%

of the funds are going directly back to the cities for local projects. In the City of Hughson, the pavement condition of all major roadways will be improved over the life of the measure. Additionally, monies has been set aside to improve the condition of smaller residential streets as well. The City has developed a detailed project list which indicates when each project is expected to be initiated.

For additional information regarding Measure L
